itelligence announces roll-out in the manufacturing industry

Vienna, April 22, 2004 - itelligence has announced the successful roll-out of it.engine, its mySAP All-in-One vertical solution, at MABA Fertigteileindustrie GmbH, Wiener Neustadt. MABA GmbH is a leading Austrian manufacturer of precast concrete parts. The roll-out of it.engine means a substantial process optimization for MABA, as the SAP-based vertical solution from itelligence enables consistent modeling of all business processes. MABA now uses SAP's FI and CO modules (Financial Accounting and Controlling) in the process chain, AA (Asset Accounting) for submitting and scheduling offers, SD for sales and distribution and PP (Production Planning) including CAD integration with variant configurator for production planning. The introduction of it.engine has immediately resulted in measurable positive effects in the form of reduced production and delivery times. As a next step, it.engine will be rolled out in MABA's branches in Hungary and Turkey.

Says Wolfgang Hübl, Project Manager at MABA Fertigteileindustrie GmbH, "it.engine has integrated all business processes and clearly reduced our administrative expenses."

The successful completion of the MABA project underlines itelligence Business Solution GmbH's consistent SAP focus in Austria. Says Klaus Heidenreich, Manager Sales & Marketing at itelligence, "We have shown MABA that an intelligent solution that is tailored to the specific requirements of their industry can easily be implemented on time and on budget at a medium-sized company."

MABA Fertigteileindustrie GmbH, www.maba.at, is a manufacturer of highly innovative precast concrete parts for the construction industry. Established in 1925, the company today employs 640 people. The company's products range comprises solutions for roads, railways, buildings, civil and electric engineering, telecommunications and environmental technology as well as bespoke products made to order. MABA's product range includes, for example, the Delta Bloc[®] traffic protection system for both temporary protection of road works and permanent road protection. The system is widely used as a central divider on motorways.

itelligence announces roll-out in the manufacturing industry

About it.engine

it.engine is a vertical solution based on itelligence's many years of experience in machine and equipment construction as well as metal and plastics processing. The software integrates all of the company divisions found in these industries. All of the core processes are modeled here. Thanks to CAD integration and collaborative engineering, BDE and MDE integration and an Internet interface, all of the required information is available at any time, substantially reducing production and delivery times as well as costs.

itelligence Business Solutions GmbH

itelligence Business Solutions GmbH, Vienna, a wholly owned subsidiary of itelligence AG, has had a presence in Austria since 1994.
