

itelligence is a SAP special expertise partner for SAP Global Trade Services

Bielefeld (Germany), October 4, 2006 – itelligence, one of the leading full-service IT providers for SAP, has been appointed by SAP Deutschland AG as a special expertise partner for SAP Global Trade Services. This enables itelligence to once again emphasize its extraordinary customer focus and project competence. With this appointment, itelligence belongs to a select group of SAP partners which have been certified for the SAP-GTS application.

Germany's highly export-oriented economy must observe a large number of customs requirements, export provisions and last but not least various boycott lists to supply its global customers punctually and continuously. This is not always a simple feat. SAP Global Trade Services simplifies and standardizes a company's foreign trade processes and is fully integrated into all logistic processes.

Along with checking all vouchers and key data against boycott lists and embargo regulations, its functionalities include electronic customs handling, the automated tariff and local customs handling system (ATLAS) in Germany and the new computerized transit system (NCTS) in Europe.

To survive in global competition, it is vitally important for companies to make use of all trade preference agreements that arise. A plant-wide preference calculation with a transparent option to archive suppliers' declarations assures the goal of meeting the legal requirements quickly and precisely.

In addition, SAP GTS provides all the forms required in international merchandise trade in the respective country languages in Adobe format. Thanks to the integration of Adobe Forms, the forms can be adapted to individual needs without more significant development effort.

With SAP GTS, companies reduce processing effort, delivery times, costs and risks while observing all legal requirements.
