Innovative document solutions for the SAP environment: itelligence is an Adobe Solution Partner in 2005

Bielefeld, March 10, 2005 - Adobe Systems GmbH and itelligence AG have announced that they will be working together as partners. Adobe and itelligence will process the growing market for intelligent documents in the context of SAP solutions using joint marketing campaigns. The first stop this year will be at CeBIT 2005 for a joint presentation of the Adobe Intelligent document platform, complemented by SAP NetWeaver technology, for use within SAP systems. As a special expertise partner for SAP NetWeaver and a Certified Adobe Solution Partner, itelligence is well positioned in the SAP environment to benefit from the growing market for intelligent document processing.

The Adobe intelligent document platform provides companies with the opportunity to create documents and integrate them into their processes. The documents can be displayed using universal client programs such as Adobe Reader®, and processed interactively. Documents and processes are thus interactively combined using the universal Adobe PDF formats (portable document format) and the logical functions embedded in the documents.

itelligence AG uses Adobe technology to generate intelligent and enhanced forms and optimized print versions within SAP systems. In addition, digital signatures can be generated for outgoing invoices and other documents. The benefit for SAP users: important Adobe technology modules are supplied by SAP together with the current NetWeaver. As a leading SAP system house, itelligence integrates SAP solutions with the Adobe intelligent document platform.

As consultants, itelligence AG is the first Adobe and SAP partner to be able to offer such a wide range of the solution possibilities of both software specialists. Herbert Vogel, Chairman of the Supervisory Board of itelligence AG: "We are using our expertise in both technologies to implement individual and cost-effective solutions for document-based processes for the mid-market. Our customers thus profit from a particularly quick return on investment."
