

itelligence AG wins new customer in the manufacturing sector

MEPA Pauli und Menden GmbH has chosen itelligence as SAP consultants

Frankfurt, February 17, 2004 – MEPA Pauli und Menden GmbH, Rheinbreitbach/Germany, a manufacturer of systems and products for the bathroom, will migrate their corporate software to it.engine, a comprehensive SAP-based solution from itelligence, Germany.

The aim of this complete migration to a consistent platform is to avoid ruptures in company processes and streamline the fast information transfer throughout the organization. The project will underline itelligence's position as the leading IT consultancy in the SAP environment for the manufacturing industry.

Dieter Käding, Project Manager at MEPA Pauli und Menden GmbH: "The introduction of it.engine will enable us to satisfy the company's growing information needs so that we will achieve greater transparency at a local and global level throughout the company and the whole Group. The itelligence consultants convinced us that the SAP-based it.engine solution is a safe and efficient controlling tool."

With a view to optimizing the company's workflows and organizational processes, MEPA opted for the following SAP logistics and financial modules:

- Sales and Distribution (SD)
- Customer Service (CS)
- Materials Management (MM)
- Production Planning and Control (PP)
- Financial Accounting (FI)
- Controlling (CO)
- Product Lifecycle Management (PLM)
- Human Resources (HR)

CRM integration and the roll-out to Austria will be the next steps.

Press release - itelligence AG

itelligence AG wins new customer in the manufacturing sector

MEPA Pauli und Menden GmbH has chosen itelligence as SAP consultants

About it.engine

Fierce competition, non-transparent price structures, complex products as well as global markets and partners characterize the situation in the manufacturing industry. it.engine is a vertical solution that is based on mySAP All-in-One, SAP's business software for medium-sized companies, and on itelligence AG's many years of experience in the mechanical engineering and high-tech industries as well as in the metal-working and plastics processing industries. The software integrates all company activities and core processes in these industries.

The tools and functions of it.engine support core processes such as:

- development of comprehensive and highly configurable products
- production, including make-to-stock production, make-to-order production and make-to-order assembly
- inventory management, providing transparency about distributor's inventories
- management of relationships with customers and business partners, including related pre-sales and after-sales services

CAD integration and collaborative engineering, production and machine data acquisition as well as an Internet interface ensure constant availability of all necessary data.

About itelligence AG:

itelligence AG is a leading international full-service provider for SAP employing some 1,000 highly qualified employees at 33 branches in 15 countries. As a mySAP Business Suite Channel, Service and Support Alliance as well as Hosting Partner and Global Services Partner, itelligence realizes complex projects in the SAP environment for over 1,200 customers worldwide. The company's services range from SAP consulting and licensing to outsourcing and services to proprietary industry-specific SAP solutions. In 2002, itelligence AG generated total sales of EUR 168.5 million.
