**ITELLIGENCE SUPPORT ADVANTAGE™ SUCCESSFULLY MIGRATES
ARMACELL LLC INTO A MANAGED HOSTING ENVIRONMENT
itelligence Will Provide Ongoing mySAP Systems Support for Global Foam Maker**

Cincinnati, Ohio, January 6, 2005 — itelligence Support Advantage, the company's customer service and support group, today announced it has successfully migrated the North American ERP System of worldwide foam and insulation maker Armacell LLC into a managed hosting environment and will provide ongoing technical and functional mySAP systems support.

itelligence Support Advantage consolidated the North Carolina-based company's mySAP landscape into a one-stop support structure. The mySAP environment combines software for enterprise resource planning with flexible technology that can integrate both SAP and non-SAP systems.

"We had been with an off-shore hosting provider, but itelligence's combination of value, hosting experience and SAP expertise won us over," said Troy Farst, IT Manager of Armacell North America.

itelligence recently received SAP Global Hosting Partner status, becoming only the fifth company worldwide to earn this recognition. This status is conferred on companies whose operations meet the highest standards of customer support and operating procedure.

The SAP R/3 4.5B server landscape implemented by itelligence offers high availability and sub-one-second response times, helping to boost the productivity of Armacell and its SAP users. Applications that were taking five hours to complete are now finished in less than 30 minutes.

The itelligence Support Advantage team administers and monitors the servers, which are hosted by collocation partner DataScope (a division of Intrieve, Inc.). This collocation

partnership enables itelligence to focus on providing SAP services while DataScape provides high quality data center facilities and the IT infrastructure. The high quality, security, and redundancy of DataScape's data centers also played a key role in SAP awarding itelligence "SAP Global Hosting Partner" certification.

"We're proud of our partnership with Armacell LLC," said Steve Niesman, itelligence's president and CEO. "We look forward to solidifying our relationship and enabling Armacell to focus on its business while we take care of the technology."

"DataScape's entire focus is on delivering the most reliable, available and secure information technology environment for our clients," said Steve Feller, vice president and chief technology officer of Intrieve, Incorporated. "Our partnership with itelligence enables them to fully leverage their expertise in delivering world-class Managed Hosting services to its SAP customers."

About itelligence

itelligence is a leading global, mid-market full-service SAP provider. We offer a full-scope of SAP services, including SAP consultancy, system integration, licensing, managed hosting, application support and education. itelligence is a wholly owned subsidiary of itelligence AG, a global consulting organization with 1,000 dedicated employees in 15 countries. One of only 12 consulting firms to earn SAP Global Partner status, itelligence has been SAP's worldwide partner since 1993.
