

itelligence AG proves once again its leading position as SAP service provider for the metal industry

itelligence announces its seventh customer from the steel industry within the last 12 months: EKO Stahl. itelligence is now the leader for the realization of SAP solutions in the metal producing and processing industry in Europe.

Frankfurt, November 08, 2001. – itelligence AG has been awarded a contract by EKO Stahl GmbH for the implementation of SAP R/3 in its three factories iron and steel production, hot-rolling mill and cold-rolling mill in Eisenhüttenstadt. The choice of itelligence AG for the system integration was made due to the provider's proven process experience in the steel industry and its strong international orientation. itelligence will be responsible for the conversion of the software modules financial accounting, controlling and material management from SAP R/2 to R/3. In addition, the in-house maintenance will be re-implemented. Further SAP projects have already been planned within the steel group. The implementation of the corporate software based on SAP R/3 for about 900 users is to be completed within 18 months.

EKO Stahl is a subsidiary of the French USINOR, one of the largest steel producers in the world. The merger of USINOR with ARBED Luxembourg and the Spanish ACERALIA was announced in the spring of 2001. Following approval by the European Union, this will be the largest steel group in the world. The goal of the new steel group is worldwide leadership in innovative steel solutions.

itelligence AG is represented as an internationally leading IT and SAP full-service provider by 1500 highly qualified SAP and IT consultants at 44 branch offices in 19 countries. The range of services offered comprises specialized SAP business-specific solutions and innovative individual software technology extending to the complete integration of highly complex IT and e-business systems, including outsourcing and services.
